

Quectel EG912Y

IoT/M2M-optimized LTE Cat 1 Module

Quectel EG912Y refers to a type of LTE Cat 1 module optimized specially for M2M and IoT applications. Adopting the 3GPP Rel-9 LTE technology, EG912Y delivers maximum data rates of 10 Mbps downlink and 5 Mbps uplink. Designed in a compact and unified form factor, EG912Y is compatible with Quectel multi-mode LTE Standard LTE Cat 1/Cat 4 EG91 and EG95 series modules, LTE Cat M1/Cat NB1 BG36 and UMTS/HSPA+ UG35/UG96 modules, which allows flexible network switch of EG912Y from a 3G network to a 4G network.

EG912Y contains two variants: EG912Y-CN and EG912Y-EU, which meet the frequency band coverage of different countries and regions. EG912Y undergoes the laser engraving process to ensure better appearance, stronger metal texture and faster heat dissipation, and to ensure that information is less erasable and EG912Y better meets automation requirements.

A rich set of Internet protocols, industry-standard interfaces and abundant functionalities (USB drivers for Windows 7/8.1/10, Linux and Android) help extend the applicability of EG912Y to a wide range of M2M and IoT applications such as industrial router, industrial PDA, tablet PC, video surveillance, and digital signage.
